| Laboratory of Molecular Genetics (Pr. Bezieau's lab), CHU de Nantes | Laboratory of Molecular Genetics (Pr. Bezieau's lab), CHU de Nantes submitted 108 novel interpretations.   |
| Change to calculation of aggregate "date last evaluated"            | <p>ClinVar is now calculating the aggregate "date last evaluated" using only the dates from submissions that also contribute to the aggregate interpretation. For example:</p> <ul style="list-style-type: none"><li>▪ a variant with submitted records from an expert panel and from several clinical laboratories will have a "date last evaluated" based only on the record from the expert panel</li><li>▪ a variant with submitted records from submitters who provided assertion criteria and evidence/public contact and from submitters who did not provide assertion criteria and evidence/public contact will have a "date last evaluated" based only on the submitted records with assertion criteria and evidence/public contact</li></ul> |

"beta" version of a new variant-centric XML file

We have developed a new variant-centric XML file that aggregates all submitted disease/phenotype information by variant (or set of variants). The new product, called **ClinVarVariationRelease**, is currently in **beta release**; however, further development is on hold. If your work depends on moving this new file into production, please let us know by emailing [clinvar@ncbi.nlm.nih.gov](mailto:clinvar@ncbi.nlm.nih.gov).

The beta release is updated bi-weekly; the release notes note updates to the XSD and known issues.
