| coming soon: changes to variant position, reference and alternate alleles in variant_summary.txt | <p>Soon we will update the way that the variant position and reference and alternate alleles are reported in variant_summary.txt. We will add columns for vcf_pos, vcf_ref, and vcf_alt. Variants that are in scope for our VCF file will have their position and ref /alt alleles reported in this way. Variants that are not in scope for our VCF file will have their position reported in the old fields: Start, Stop, ReferenceAllele, AlternateAllele. A variant is expected to be reported one way or the other, but not both.</p> <p>This change will make variant_summary.txt more consistent with ClinVar's VCV XML file.</p> <p>Please contact us as clinvar@ncbi.nlm.nih.gov if you have questions or comments about this change.</p> |
| coming soon: change in how p. expressions are stored in XML | <p>Soon we will change the way we handle p. expressions that are incomplete because they lack an accession.version, e.g. p. Tyr1863Cys. We will store these descriptions in the XML files as alternate names, rather than as HGVS expressions.</p> |
