

20190606_data_release_notes

Overview of changes in the release of June 6, 2019

Please also see our [RSS feed](#) for information about accessing the data.

Overview of submissions: 2019

Date	Total Submissions
Jan 01, 2019	759562
Feb 07, 2019	778673
Mar 01, 2019	782638
Apr 01, 2019	787656
May 01, 2019	795045
Jun 01, 2019	811551

Content

Brief	Explanation
International Society for Gastrointestinal Hereditary Tumours (InSiGHT)	InSiGHT submitted 54 records, including both novel and updated records.
Color	Color submitted 16,346 records, including both novel and updated records.
CeGaT Praxis fuer Humangenetik Tuebingen	CeGaT Praxis fuer Humangenetik Tuebingen submitted 5,529 records, including both novel and updated records.
Integrated Genetics/Laboratory Corporation of America	Integrated Genetics/Laboratory Corporation of America submitted 3,976 novel records.
Illumina Clinical Services Laboratory	Illumina submitted 2,633 records, including both novel and updated records.
CHEO Genetics Diagnostic Laboratory, Children's Hospital of Eastern Ontario	CHEO Genetics Diagnostic Laboratory, Children's Hospital of Eastern Ontario submitted 2,272 records, including both novel and updated records.
Center for Human Genetics, University of Leuven	Center for Human Genetics, University of Leuven submitted 111 novel variant interpretations and updates to 2 records.
coming soon: changes to the web display, web search, and E-utilities	The newly designed ClinVar pages will end their "alpha" release soon and move to production on www. This change will be accompanied by some changes to web search and E-utilities. See the web release notes for more information.
coming soon: HGVS expressions updated to standard format	We calculate HGVS expressions for variants that are reported to ClinVar. Within the next several weeks, we will update many of the HGVS expressions that we calculate, to reflect changes to the HGVS standard, including do not report the duplicated or deleted sequence for a duplication or deletion. Note that HGVS expressions provided by submitters will not be updated; they are retained as submitted.
coming soon: use of MANE transcripts for preferred names for variants in ClinVar	We calculate a preferred name for each variant in ClinVar, often using a RefSeq transcript as the reference sequence. Soon we will preferentially use transcripts from the MANE project in the preferred name. Read this NCBI blog post for more information about MANE transcripts: https://ncbiinsights.ncbi.nlm.nih.gov/2019/03/12/mane-select-v0-5/

<p>coming soon - genomic location for variants with defined endpoints will be reported only as "VCF-style"</p>	<p>Genomic location for variants with defined endpoints currently reported in the ClinVar XML in two ways:</p> <ul style="list-style-type: none"> • start and stop, which are right-shifted similar to the HGVS standard • vcf_start and vcf_stop, which are left-shifted similar to VCF format <p>We plan to simplify reporting of genomic location and only report the location as the left-shifted position, for consistency with VCF format. This change is not yet scheduled. If you have any concerns, please write to us as clinvar@ncbi.nlm.nih.gov.</p>
