Preface

The fingerprint Roll installs and configures the ...

Please visit the fingerprint site¹ to learn more about their release and the individual software components.

Notes

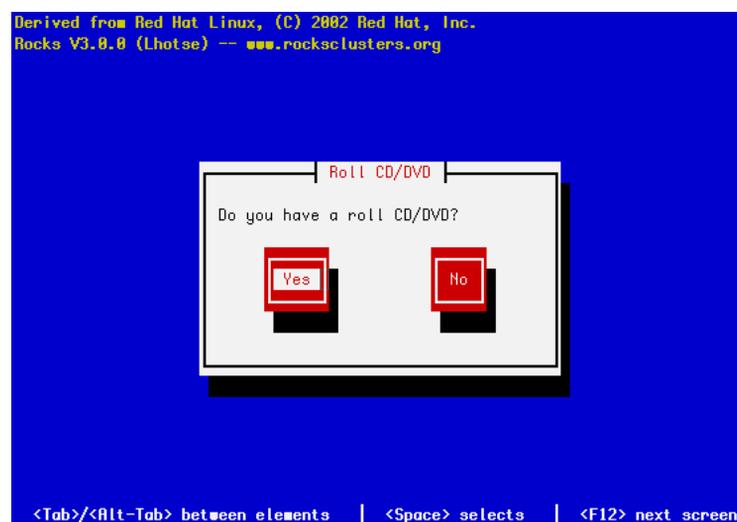

1. <http://link-here.html>

Chapter 1. Installing the fingerprint Roll

1.1. Adding the Roll

The fingerprint Roll must be installed during the Frontend installation step of your cluster (refer to section 1.2 of the Rocks usersguide). Future releases will allow the installation of the fingerprint Roll onto a running system.

The fingerprint Roll is added to a Frontend installation in exactly the same manner as the required HPC Roll. Specifically, after the HPC Roll is added the installer will once again ask if you have a Roll (see below). Select 'Yes' and insert the fingerprint Roll.

Chapter 2. Using the Fingerprint Roll

2.1. Using the Fingerprint Roll

The user guide for Fingerprint can be found at the Fingerprint web site¹
